# The New York Times Q. Mr. President, there's such consist about "dense pack." Can you get a popular why it's the best system, and how it would work? A. Well, it was the best system in

# Transcript of Reagan News Conference on the MX

#### OPENING STATEMENT .

OPENING STATEMENT

I have a statement here first, I just wanted to say a word about the importance of the defense issue in the closing days of this Congressional seisoria. It's vital, that wa in government demonstrates to friends and potential was represented in the control of the defense issue in the closing days of this Congressional seisoria. It's vital, that wa in government of the demonstrates to friends and potential was remained to retain a creditable remain a creditable force for peace in the world.

There are several critical decisions now facing the Senate, including their votes on the Briand a second carrier. I see that this message will be the same as in the past; A vote against MX products on the production of the Peace-keeper missile. Frankly, I was disturbed by the debate in the House earlier this week after the House earlier this week because of the confresal, "Soviet Cheer House for Rey vote in the House, and now in the world, which was the vote meant. The key vote in the House, and now in the world, which was the vote meant to a strong, secure defense that we vote now much for that this sille. Then next year, as we have more time, I welcome a vigorized shade to expend the production of the passing mode. And I believe it's absolutely essential to a strong, secure defense that we vote now much for that this units sille. Then next year, as we have more time, I welcome a vigorized shade to expend the production of the passing mode. And I believe it's absolutely essential to a strong, secure defense that we vote now much for that this units and the production of the Peace-keep the production of the production

#### QUESTIONS AND ANSWERS

Ready to Compromise?

Q. Are you ready to go back to the drawing board on the "dense pack"?

You do sound like you are may be well-ing to compromise on the whole question.

A. Well, in the selection of a basic, which is the proper was long study, and there was not destroy our missile that, what was was called "frastriction."

All, in the selection of a basic, which is the proximity that the first exploited the passing faces a time in which the other side is going to create a vulnerability of this system. This one did finally come down as probably offering the sequence of the proper was a selectific evidence, and from pretty reputable people, given that it presented an obstacle to an overly the proper was a selectific evidence, and from pretty reputable people, given that it presented an obstacle to an overly the two was transfer was was called "frastriction."

All there's a selection of a basic was a selectific evidence, and from pretty reputable people, given that it presented an obstacle to an overly that the young reasy was called "frastriction."

All the selection of a basic condition of the was been desired and it proper was the debate and discuss and entire the proper was the selection of the present in the present of the present in the present of the pre You do sound like you are maybe willing to compromise on the while question. Well, in the selection of a basing mode there was long study, did there was long consideration of any number of proposals. Now any projectal for basing faces a time in which the other basing faces a time in which the other basing faces at time in which the other basing faces and the debate up there. The other basing faces and the debate up there is the other basing faces and the debate up there is the other basing faces and the debate up the other basing was to debate and discuss and some and the debate of the other basing in the face of the other basing for the time of the other basing for the proposents of that amendment in the proposents of the time of the other basing mode. And this was funding at the face of the other basing mode. The other basing mode was the proposed to the basing mode.

Welcomes Further Debate

Welcomes Further Debate
Q. Mr. President aren't you wavering then on the "desep pack"? How
ing then on the "desep pack"? How
ing the you to look for a vigorous
debate, are you to look for a vigorous
hate were those, and my own opposition to one that had been proposed.
But when you've spent that much
time, and the Congress, on the other
late were asking for money to
start productor of the missile and
that I would welcome further discussion and debate on the basing mode.
So in an expert of a demand of the Congress. They demanded that we make a
recommendation of a basing mode. So
we chose the best one of all those that
had been proposed.

Senate Action Ahead

#### Senate Action Ahead

Q. Are you concerned that "dense pack" is going to be defeated in the Senate as it was in the House? Is that why you're trying to de-emphasize "dense pack"?

A. I tried to de-emphasize it in the House.

#### Issue of Budget Deficit

Issue of Budget Deficit
Q, Sif, are you apprehensive that up
on Capitol Hill that the MX might become not just a symbol of defense but
a symbol of defeirs? If you've to cut
somewhere, this might be it.
A. Well, as load all during the camnent is the said all during the camment is the said all during the camment is the said all during the camment is the security and the freedom
of the people of this country. And if it
comes down to a choice in a deficit
period of this kind, of deficit or national security. And the Congress
should also, And the drumbeat, the
constant drumbeat, with which I'm
sure many of you are familiar, about
sure many of you are familiar, about
ting at this time, ignores the fact that
the percentage of the budget that is
devoted to defense even in this atthe percentage of the budget that is
devoted to defense even in this atthe percentage of the budget that is
devoted to defense even in this atthe percentage of the budget that is
devoted to defense even in this atthe percentage of the budget that is
devoted to defense the fact that
the percentage of the budget that is
devoted to defense even in this atbeautiful the budget in the solution of the budget.

Possibility of Reversal

### Possibility of Reversal

Q. Mr. President, assuming the Senate does go with the production funds, do you have any reason to believe the House conferees will reverse their own body's action, in the conference? Will they go along with it in a conference report. Well, there's always that opportunity. You have a second go at it,

#### Flexible on Basing Plan?

Q. Mr. President, are you saying that you're backing the MX but you're not specifically backing the "dense pack" basing system? That that's flexible?

#### **Question of Deadline**

Q. Was there undue pressure upon you to make a decision by this deadine?
A. This is what had been — the deal had been made with the Congress, this is what they asked for, and I met the deadline.

#### Position of Joint Chiefs

Position of Joint Chiefs
Q. But, Mr. President, if this "dense
pack" setup is so good, in your estimation, why did the Joint Chiefs vote 3 to
2 against expensive and the position of the Timean,
the state of the country.
A. Because, except for one, the
others favored the one thing that we
had first proposed to Congress and the
Congress refused to accept, which
was placing the missiles as they came
siloer And Congress refused that abso-

#### Influence in Congress

Influence in Congress

Q. Mr. President, how was this overwhelming rejection, and the constraints of the con

### An Eternal Optimist

Q. Are you fearful that you're now going to start to get an awful lot less?

A. You know me, I'm an eternal optimist.

#### Nuclear Freeze and Soviet

Nuclear Freeze and Soviet

Q. Mr. President, sir, you mentioned earlier that the Mx vote was
good news in the Kremlin. Do you acport the House intelligence Committee report that proponents of the nuclear freeze are not being manipuintelligence and the sign of the conclear freeze are not being manipuintelligence and the sign of the conclear freeze are not being manipuintelligence and the sign of the conclear freeze are not the conclear freeze that have appeared in print with regard to, let us
say then, "participation" in the peace
movement by the Soviets, We know
that was the World Pasce Concil,
which is a Soviet organization supported by and maintained by them. I
can tell you that I have made inquiry
on some of the articles that have appeared and asked for an analysis of
the reports that I have received back
was that, with here and there an exception for journalistic exaggeration,
they did check out. I say again that the
millions of people who are supportive
and well-intentioned. And from that
standpoint we share the Same goals. I
think that a freeze would be just fine it
we can get down first to equality between the two countries.

The start of the start of the same goals of the conmediate of the start of the same goals. I
think that a freeze would be just fine it
we can get down first to equality between the two countries.

### Time to Stop Being Nice?

Q. What's that 'No More Mr. Nice Guy' on your desk? A. That was a gift. You know, some people just think that I've got to stop being so nice to all of you. Q. Will you hold it up for the cam-

eras?
A. It was a gift. I find that it helps a little with some of the memos that I scratch out.
Thank you, Mr. President.

#### Facing Tough Fight

A Let me be perfectly honest with you. I have no doubt that we're faced with a toosh fight, And we're going to with a toosh fight, And we're going to here and say, well, this is going to be here and say, well, this is going to be breeze. And again, I think the difficulty is making them consider the med for the missile and recognize med for the missile and recognize and the paint of the basing mode. But every argument that I've heard against it has do do with the besting mode. But every argument that I've heard against it has do with the besting mode. Five —I do do with the besting mode, Five —I bate in the House, but I head very few people saying that the missils, com-

### **Next News Session**

Q. When are we going to see you again? Will we see you more often?

## President Says Freeze Proponents May Unwittingly Aid the Russians

By JUDITH MILLER

ASHINGTON, Dec. 10 — President in Bent But Representative Edward P. Bent But Representative Edward P. Beland, the Massachusetts Democrat potents of a nuclear wespons freeze with unwittingfly by "carrying water the Syviet Union or adding it." When the Syviet Union or adding it. The syviet agents have had no significant, influence in the nuclear freeze to the conded and from that standpoint that the same goals," Mr. Reagan that a new gooffense as the Accordance of the fuel But and of Investigation, told the House its analysis.

Sang at a users confice.

"All 'I'm saying is that one must look to see whether, well-intentioned though it may be, this movement might be carrying water that they're not aware of for another purpose," the President added. "Incidentally, the first man who proposed the nuclear freeze was in Feb. 21, 1891, in Moscow, Leonid Brezhnev."

# **DOCTOR CONFIRMS EXCESS OF CYANIDE**

Victim's Husband Says Testing of Capsules Was Delayed

Special to The New York Times

SAN FRANCISCO, Dec. 10 — The
doctor treating a San Jose woman believed to be a victim of poisoning by
grandle laced capsules of Anacia's inconditional control of the san Jose Mental

property of the san Jose Mental

believed of Cyanide in her body when
she was admitted for treatment.

Meanwhile, the woman's husband,
Edward of the San Jose Mental

been rebuffed by 10 public agencies and

private laboratories when he suspected

been rebuffed by 10 public agencies and
